5.0 **Chief Executive’s report.** The Vice-Chancellor, Professor Wonnacott presented the CEO’s report for October 2021. Governors noted, in particular, the following areas covered by the report.

   i. **The Times & The Sunday Times Good University Guide**
      The Vice-Chancellor reported a significant drop in the University's ranking in the Guide, which was discussed.

   ii. **Coronavirus**
      The Vice-Chancellor reported that: the University was continuing to work closely with Public Health officials in Leeds, Environmental Health and the Council; the University's Covid-19 outbreak plan had been approved by Public Health and submitted to the Department for Education.

      In response to Governors' questions it was noted that, while the Office for Students (OfS) had suggested that providers might survey students' Covid-19 vaccination status, the University had taken the decision not to undertake a survey as the majority of the University's students would not yet be eligible for a second vaccination; the University's own track and trace team had, however, asked students with whom they came into contact if they had been vaccinated, with indications that vaccination take up was high.

   iii. **Skin’s Chancellor Scholarship**
      The Vice-Chancellor reported that: the first year of Skin’s Chancellor Scholarships had been awarded to three students who had started their undergraduate studies at Leeds Arts University in 2021/22.

   iv. **Research**
      Governors commended staff for the significant amount of research noted in the report.

   v. **Successes**
      Governors commended the significant number of student successes contained in the report and detailed on social media and thanked staff for their support for and work with the University's students which had contributed to their success.

      Governors discussed in particular the annual Leeds Arts University Sustainability Awards.

The Board of Governors received the CEO’s report for October 2021.

6.0 **Strategic Review.** The Vice-Chancellor presented the report on the Strategic review,
noting that the University's strategic plan covered the period 2017 to 2023. Governors considered and discussed the report, including the review of key performance indicators (KPIs).

Governors noted that, having previously made very good progress against the KPIs accompanying the strategic plan, 2020/2021 had been a more challenging year for the University and not all KPIs had been positive, with the continuing pandemic and lockdown between the start of January 2021 and March 2021 having had a more substantial impact on the student experience;

Governors considered a table showing a comparison of the University's overall satisfaction score in the NSS against specialist and regional institutions.

Governors noted that:
- The University's NSS results were below the University's expectations and benchmarks, with the University's previously high overall satisfaction score reduced significantly;
- Work streams and projects were being undertaken by the University to address the issues that the survey highlighted and to return satisfaction to its historically high level;
- Safety remained a priority but students were being encouraged to attend on site as much as possible to encourage a sense of community, collaboration between courses and to take part in student societies.

Governors noted that the University's undergraduate non-continuation rate remained low compared to the institutional benchmark and the Creative Arts and Design subject area, which was positive.

Governors noted that: the Graduate Outcomes survey, which was managed nationally by Graduate Outcomes, had taken place between September 2020 and November 2020; results had been affected as graduates had struggled to find highly skilled jobs during the pandemic.

Governors noted that: due to the pandemic, the FE Learner Satisfaction Survey had not taken place; overall achievement rates in FE had remained positive, with an overall rate of 91.8%, which was slightly above the FE sector benchmark, with rates above 90% having been sustained at the University over the last 5 years.

Governors noted that the University had submitted to the Research Excellence Framework (REF) and would know the outcome in May 2022.

Governors noted that: the University had successfully expanded its postgraduate provision.

Governors noted that the latest undergraduate international enrolment numbers were in line with the University's target, which was a positive achievement, taking into account the pandemic and the restrictions in many countries, including the UK, which had affected student recruitment nationally.

Governors noted that:
- Home undergraduate enrolment (including returners) was positive, despite the pandemic, although the applicant conversion rate was lower than the aspirational target which had been set in the original plan.

In response to Governor’s questions it was noted that:
• The next Teaching Excellence Framework (TEF) exercise had been postponed until 2023;
• With reference to graduate careers, the University provided careers and employability support to graduates for 5 years after graduation, including access to the University's online system and the ability to book sessions with staff members;
• The pandemic meant that work experience and opportunities had been unavailable but the Careers, Enterprise and Employability team were working hard to offer internships and placements now that restrictions had eased and the industry was opening up again;
• In relation to the reference in the Academic Board minutes (minute 5, Periodic Review) to the importance of supporting students to develop resilience and self-management as set out in the Subject Benchmark Statements, it was noted that work was being done with course teams to develop students as autonomous learners;
• With reference to the continuing relevance of the measures in the University's strategic plan, it was noted that the plan covered the period 2017 to 2023, which meant that the University was currently halfway through the plan, with a strategic discussion planned for the Governors April 2022 Informal meeting;
• The University had not expected the fall in overall satisfaction seen in the NSS to be as significant and had put a range of measures into place to improve this,
• Although the NSS headline figure for student satisfaction had been low, there had been a number of the University's courses which had performed well.

The Vice-Chancellor confirmed that the University's immediate focus was improving student satisfaction and graduate outcomes but the future remained uncertain and challenging, both in relation to the pandemic and its aftermath and possible future changes in Government policy.

The Board of Governors received the report on the strategic review.

Professor Pickles left the meeting.

8.0 Management accounts. The Pro-Vice-Chancellor Assurance & Director of Finance, Ms Bailey presented the management accounts and commentary for the year ended 31st July 2021, including a review of financial KPIs, which was considered.

Governors noted that:
• The year-end operating surplus was higher than budget but in line with 2019/20;
• Income was above budget as a result of the undergraduate tuition fee non-collection rate being better than the prudent budget assumptions;
• The balance sheet was strong and the University had good cash reserves.

It was noted that student numbers had continued to increase as a result of 2020/21 being the third year of the new undergraduate courses and that there had also been an increase in postgraduate students, with academic staffing having increased as a result.
of increased student numbers.

The impact of the pandemic in 2020/21 was noted in discussion of the July 2021 monthly accounts with the following being noted in particular:
- The budget for external exhibitions had not been spent;
- Expenditure on events had included the cost of two graduation ceremonies;
- There had been a lower spend on materials and course consumable costs but an increase in the materials allowance paid to students compared to budget.

In response to Governors’ questions concerning investment by the University and student satisfaction, the Vice-Chancellor reported that: during the pandemic, the University had supported students, increased the University's hardship funds and the student materials allowance and had invested in equipment and resources; student tuition had continued to be provided although, where necessary, online; there had been some student dissatisfaction with student accommodation during the pandemic, which related to private accommodation providers as the University had no accommodation of its own.

With reference to the University's reserves and future plans to invest in its estates, it was noted that these would be reviewed later in the year when there should be greater clarity about a number of Government policy decisions which could affect the University's financial situation.

The Board of Governors noted that the Office for Students (OfS) had confirmed that a committee of the University's governing body would no longer have to confirm compliance with the Transparent Approach to Costing (TRAC) requirements and approve the TRAC return and agreed that the following paragraph should therefore be removed from the Audit Committee's terms of reference ‘r) Reviewing and approving the University's Annual Transparent Approach to Costing and TRAC(T) return’. - All current Teaching Excellence Framework (TEF) awards had been extended until publication of the outcomes of the next TEF exercise and it was expected that the new awards would be published in early 2023, subject to OfS consultation;
- Universities had been told by the OfS not to promote or use the extended awards to inform student choice once the 2021 student application cycle had been complete in September 2021 and the University had therefore removed reference to the TEF award from its website.
